

Aim: Develop static HTML5 skeletons for at least 10 StudentHub pages such as

Home, About, Register, Login, Dashboard, Events, Profile, Contact,

Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly

structure.

Tools/Technology to be Used: VS Code, HTML5, browser accessibility inspection tools

Theory Logic: The main concept of this practical is to create the basic structure of the StudentHub portal using **HTML5**. Semantic HTML tags are used to organize content clearly, while hyperlinks connect different pages and provide easy navigation. Forms are used for user input such as registration, login, and password reset. Tables and lists are used to display information such as attendance, results, timetable, events, gallery, and notices. This practical focuses on creating clean, linked, and accessibility-friendly HTML page structures before adding advanced styling or functionality.

Code:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
  <title>StudentHub - Home</title>
```

```
  <link rel="stylesheet" href="home.css">
```

```
</head>
```

```
<body>
```

```
  <div class="header">
```

```
    <h1>StudentHub Portal</h1>
```

```
  </div>
```

```
  <div class="main">
```

```
    <div class="sidebar">
```

```
      <h3>Quick Links</h3>
```

```
      <a href="login.html">Login</a>
```

```
      <a href="Register.html">Register</a>
```

```
      <a href="forgot.html">Forgot Password</a>
```

```
      <a href="about.html">About Us</a>
```

```
    </div>
```

```
<div class="content">
```

```
<h2>Welcome to StudentHub</h2>
```

```
<p>This portal helps students access academic information, notices, attendance, results, and  
events.</p>
```

```
<div class="grid">
```

```
<a href="Courses.html"><div class="card"><h3>Courses</h3><p>View all  
courses</p></div></a>
```

```
<a href="Attendance.html"><div class="card"><h3>Attendance</h3><p>Check your  
attendance</p></div></a>
```

```
<a href="Results.html"><div class="card"><h3>Results</h3><p>See your  
results</p></div></a>
```

```
<a href="simpletimetable.html"><div class="card"><h3>Timetable</h3><p>Class  
schedule</p></div></a>
```

Output:

The screenshot shows a web browser window with the title "Student Login". The browser's address bar displays the file path "file:///e:/3A/wdf/Student%20portal/login.html". The page content includes a form with two input fields: "Student ID:" and "Password:". Below the password field is a "Login" button and a link labeled "Forgot Password!!!!". At the bottom of the form, there is a text prompt "Don't have an account?" followed by a link labeled "Register here".

The screenshot shows a web browser window with the title "Forgot Password". The browser's address bar displays the file path "file:///e:/3A/wdf/Student%20portal/forgot.html". The page content includes a heading "Forgot Password" followed by the instruction "Enter your Student ID and registered email to reset your password:". Below this is a form with four input fields: "Student ID:", "Email:", "New Password:", and "Confirm Password:". At the bottom of the form, there are two buttons: "Reset Password" and "Clear". Below the buttons is a link labeled "Back to Login".

Available Courses

Computer Engineering

- Programming in C
- Data Structures
- Java Programming
- Web Development
- Database Management
- Computer Networks

Information Technology

- Python
- Cloud Computing
- AI Basics

Mechanical Engineering

- Thermodynamics
- CAD
- Manufacturing

Attendance Record

Subject	Total	Present	Percentage
C Programming	40	38	95%
Java	35	32	91%
DSA	30	28	93%
CN	25	24	96%

Overall Attendance : 94%

Question-Answer:

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

Partially. The HTML uses structural elements such as headings, tables, forms, and links, but the provided pages mainly use <div> elements instead of consistently using semantic tags like <header>, <nav>, <main>, <section>, and <footer>.

2. Are form labels, headings, image alt text, and navigation links accessible?

Partially. Headings and navigation links are provided, and forms contain descriptive text for their fields. However, the form fields are not consistently connected to <label> elements, and the gallery image does not include an alt attribute.

3. Is the page structure consistent across all pages?

Yes, mostly. The pages follow a similar HTML structure with headings, content sections, and navigation links. However, some pages use different layouts and navigation structures, so further standardization would improve consistency.

Conclusion : I will create clean, linked, and accessibility-ready HTML page structures.
